What is the advantage of having a Bachelor's degree over an Associates degree in Radiography?

Many indicators point to the increased need for the Radiologic Technologist to possess a higher level of education in order to remain competitive in an ever-changing healthcare environment. The American Registry of Radiologic Technologists now requires further education and competency in all fields of imaging technology.

How can I find out if my pre-requisites transfer?

We will grant you 53 credits automatically for having your current and active ARRT certificate, but there are still pre-requisite courses required. The courses required are based on your academic history. First you will need to create a MyResU page by going to http://my.resu.edu/inquiryform. Once you are brought to your main page, click on the tab titled, “Getting Your Transcripts Evaluated” and follow the instructions there.

When can I start and what is the application deadline?

The BSIT Post-Licensure program starts in the Fall, Spring and Summer semesters each year. We accept applications on a rolling basis until all seats are filled.

What does the schedule look like?

This program is available 100% online and courses are delivered in 15-week terms.

What is the application process?

You will first need to submit your online application through your MyResU page. If you do not have a MyResU page yet, please create one by filling out the inquiry form here: http://my.resu.edu/inquiryform. The rest of the process is to submit official transcripts from every college/university attended and a copy of your current ARRT license.

What is the admissions criteria to get into this program?

We look for an overall GPA of a 2.0 or higher, along with a current ARRT certificate. You must be in good standing at all prior colleges and universities attended.
